

Free-Sat™

Item# FS-NT1-77

FREE-SAT™ pre-saturated wipes have four clean-cut edges as opposed to having long, stringy loose fibers on two sides due to perforating. These 7" x 7" wipes are packaged in handy containers that allow the user to open, remove a wipe, and close the container with one hand. Hence freeing up the other hand to hold a circuit board or other item. Because the block of 100 wipes are pre-saturated in tough sealed nylon bags within the container, shelf life is dramatically increased. The fabric itself, NOVA-TECH 1000™, is an especially effective wipe. It is tough, abrasion resistant and virtually free of particle generation and extractable chemical. It is comprised of a synergistic blend of virgin polyester and cellulose that is hydro-entangled into a uniform tough fabric. These unique features make NOVA-TECH 1000™ fabric a very effective wipe.

- 70% isopropyl alcohol/30% de-ionized water
- Uses NOVA-TECH 1000 material
- Ultra low lint and nonvolatile residue
- Very user-friendly containers
- Custom products available
- PRESATURATED non woven wipes
- 7" x 7", C-folded

Specifications

Colour: White

Features and Benefits:

- No exposed wipes, hence, no wicking and no rapid evaporation
- No small dispensing hole with sharp points, hence, no abrasion and loosening of fibers
- Easy one-at-a-time dispensing of wipes
- Four clean-cut edges, hence, NO LOOSE STRINGY FIBERS!
